

YASHWARDHAN KUMAR

yashwardhankumar15@gmail.com | +91 7903533747 | github.com/yashh152004 | [LinkedIn](#)

PROFESSIONAL SUMMARY

Full Stack Java Developer with hands-on experience building scalable, production-ready applications that solve real-world problems. Skilled in Java, Spring Boot, React, and REST APIs, with experience developing secure authentication systems, real-time applications, and cloud-ready solutions. Open-source contributor to a Y Combinator-Backed Companies and recognized among the Top 50 teams nationally at the IIT Dharwad and GDG Hubli Hackathons. Passionate about problem-solving, clean architecture, and continuously learning modern software engineering practices.

TECHNICAL SKILLS

Languages	Java, Python, C
Backend	Spring Boot, Spring Security, Spring MVC, Hibernate/JPA, REST APIs, WebSocket, JWT, Maven
Cloud & DevOps	AWS (EC2, S3, RDS), Docker, DockerHub, Git, GitHub Actions (CI/CD), Linux
Databases	MySQL, PostgreSQL, MongoDB, Redis, Firebase Firestore
Tools & Others	Postman, IntelliJ IDEA, VS Code, Figma, JUnit, Mockito, Microservices, Kafka (basics)
AI &Generative AI	Spring AI, Claude, Gemini, OpenAI API, Prompt Engineering, Retrieval-Augmented Generation (RAG), MCP (Model Context Protocol)
Frontend	React, HTML5, CSS3

EXPERIENCE

Open Source Contributor — [Aden \(YC-backed\)](#) | MCP Server (Open Source)

Jan 2026 – Mar 2026

AI · REST API · MCP · JSON · Git · Open Source

- Contributed to a **Model Context Protocol (MCP) server** for a Y Combinator-backed startup, enabling structured communication between AI clients and backend services
- Designed and implemented **RESTful APIs** for context exchange, request routing, and response aggregation across distributed backend components
- Optimized request-handling pipeline, reducing **client-server latency** and improving server throughput for concurrent AI client sessions
- Standardized inter-service communication using **JSON-based data contracts**, improving reliability and reducing integration bugs across distributed components
- Participated in full **open-source development lifecycle** — Git branching, pull requests, code reviews — delivering scalable backend features in a collaborative remote team

Java Backend Intern — [IndoLike](#)

Jun 2025 – Jul 2025

- Developed and shipped **Java backend modules** in a production codebase, applying OOP design patterns and collaborating via Git branching workflows
- Resolved **3 critical production bugs** related to API responses and data flow, improving application stability and reducing error rate

Freelance Full-Stack Developer — [Gaanvi Tours and Travels](#)

Apr 2025 – Jun 2025

- Designed, built, and deployed a **responsive booking & itinerary management website** from scratch using HTML, CSS, JavaScript with SEO optimization
- Implemented **dynamic contact forms and destination showcases**; delivered on-time to a live client with full cross-device compatibility

PROJECTS

OpsMind — AI-Powered Incident Intelligence & Observability Platform

github.com/yashh152004/OpsMind.git

React · Spring Boot · MySQL · Docker · WebSockets · AI/RAG · Cloud

- Built a full-stack enterprise observability platform for monitoring infrastructure, managing incidents, analyzing system reliability, and generating AI-driven operational insights.
- Developed scalable Spring Boot APIs and React dashboards supporting incident lifecycle management, real-time alerting, infrastructure monitoring, analytics, and role-based access control.
- Implemented AI-powered SRE Copilot using Retrieval-Augmented Generation (RAG) for root-cause analysis, incident summarization, anomaly detection, and operational recommendations.
- Designed real-time event processing using WebSockets for alert streaming, incident updates, health monitoring, and operational intelligence dashboards.
- Built predictive analytics modules for outage prediction, SLA compliance tracking, service reliability analysis, MTTR/MTTD reporting, and infrastructure health visualization.
- Containerized services using Docker and designed cloud-ready architecture suitable for large-scale distributed systems and enterprise operations.

MP Connect — Citizen Grievance & Social Governance Platform

github.com/yashh152004/MPConnect_Backend.git Java ·

Spring Boot · MySQL · JWT · WebSocket · Docker · GitHub Actions

- Built a citizen-centric governance platform enabling residents to report public issues, track grievance resolution, and communicate directly with government officials.
- Developed scalable Spring Boot backend services supporting user profiles, social interactions, grievance lifecycle management, and real-time notifications.
- Implemented JWT authentication and role-based access control (Citizen, Official, Admin) using Spring Security.
- Engineered complaint workflow management with document handling, audit tracking, status transitions, and automated notifications.
- Designed WebSocket-based real-time communication and automated CI/CD pipelines using Docker and GitHub Actions.

Swiggy-Style Search Relevance Optimization using OpenSearch LTR

github.com/yashh152004/Swiggy_Approach.git React.js ·

Node.js · Express.js · OpenSearch · Learning-to-Rank (LTR) · Docker

- Built a full-stack food discovery platform inspired by modern food delivery applications using React, Node.js, Express, and OpenSearch.
- Investigated real-world search relevance challenges and implemented Learning-to-Rank (LTR) techniques to improve ranking quality beyond traditional BM25 search.
- Developed advanced search capabilities including autocomplete, custom ranking signals, feature engineering, and relevance-aware APIs.
- Automated indexing pipelines, feature generation, model deployment workflows, and search infrastructure using Docker-based environments.

ACHIEVEMENTS

- IIT Dharwad Techfest Hackathon** — Selected nationally for 48-hour hackathon for Aashray, an AI/IoT women safety platform
- GDG Hubli Hackathon 2025** — Ranked **Top 50 nationally** for BlockCert, a blockchain-based document verification system
- AI Automation Competition** — **Top 15 globally** at AI Library's automation challenge
- IIIT Hyderabad Summer of AI** — Selected for advanced AI/ML internship program out of national applicant pool

EDUCATION

B.E. Computer Engineering | PESITM, Shivamogga 7.8 CGPA 2023 – 2027
